

# Facts you need to Know!

## Parabens and Breast Cancer.

**A U.K. study highlights the need for more research on the potential link between parabens and increased breast cancer risk.**

### ***Further Research Must Be Conducted***

- Prenatal exposure to parabens, and the potential effect on adult cancer risk
- Parabens also may affect the development of the male reproductive system.

**Evidence makes a compelling case for taking a precautionary approach, individually and collectively, to the manufacture and use of parabens.**
